### JOB DESCRIPTION & QUALIFICATIONS

#### **Summary**

Job Type – Full Time

Rate of Pay – Salary commensurate with experience and qualifications

Location – Kiena Mine, Val d'Or

Shift Schedule – Monday to Friday Schedule

Reporting to the Chief (Exploration) Geologist, you will be responsible for assisting in the planning and management of surface and underground exploration drilling at the past producing Kiena Mine. You are a self-starter with a solid technical background, safety conscious and prepared to work in a team environment.

#### **Responsibilities / Job Duties Performed**

- Responsible for assisting in the planning and management of surface and underground exploration drilling;
- Produce diamond drill plans and communicate drill schedule with the mine department and drilling contractors;
- Work with core samplers and oversee preparation of samples for the assay lab;
- Update and produce geology drawings and interpretation as required;
- Data collection, entry and management;
- Maintain safe and environmental practices. Must comply with Occupational Health & Safety Policy. Must comply with Environmental Policy;
- Mapping and sampling of any underground development;
- Assist in creation of 3D ore models based on diamond drilling;
- Make recommendation on high potential areas for future resource expansion;
- Establish and monitor where necessary, standards and procedures for drilling, core logging, sample collection-labelling-storage, sample preparation-transportation-assaying-reporting, quality control and verification according to NI 43-101;
- Liaise with, and supervise, contractors and consultants as required; and
- Interact with other members of the management team to ensure effective and timely communication.

## **Qualifications**

- BSc in geology with 5 years of progressive “hands on” professional experience, with drilling, preferably in underground and open pit mining;
- Registered (or eligible for registration) with Professional Association
- Proficient in geologic software and database management, i.e. Leapfrog, Autocad, Excel, MapInfo;
- Communicate in French and preferably English;
- Strong interpersonal and teamwork skills;
- Excellent communication and presentation skills;
- Detailed knowledge of gold deposits, relevant experience in mining geology, especially in narrow vein deposits; and
- Knowledge of core logging and data capture.

## **LOCATION OF ROLE**

The selected individual will be located at the Kiena Mine in Val d’Or, Quebec (see location in Company Information).

*We wish to thank all applicants for their interest and effort in applying for the position; however, only candidates selected for interviews will be contacted.*
