We expect to complete development of our first 300 lens in the second quarter with production commencing in the second half of 2015. We look forward to developing the much higher grade 300 West lens in the second half of the year.”

Please refer to attached figure detailing the 300 West lens, the completed drift and drifting results on the 750 metre level which is anticipated to be in stope production in the second half of 2015.

**ABOUT WESDOME**

Wesdome Gold Mines Ltd. is in its 28<sup>th</sup> year of continuous gold mining operations in Canada that employ a profit growth approach.
