

PRESS RELEASE

EAGLE RIVER OPERATIONS UPDATE

Toronto, Ontario – September 5, 2013 – On Sunday, September 1, 2013, a lightning strike hit the Company's main electrical transformer at the Eagle River mining and milling complex located 50 km due west of Wawa, Ontario.

Backup diesel generators are sufficient to maintain limited services only. A replacement transformer and backup transformer have been sourced and full service is expected to be restored in approximately 2 weeks.

Rolly Uloth, CEO stated "It's unfortunate as we were making good progress increasing mill efficiency. Throughput had been up about 50% so far in the third quarter, compared to the average in the first half. For the months of July and August, Eagle River operations produced approximately 7,800 ounces of gold. We will assess our options and flexibility to attain annual production guidance and report accordingly."

ABOUT WESDOME
